

Brand Guide

Logotype and Mark

Logo versions and components

The logo has an horizontal version, with the text aligned on the right of the mark, and a square version, with the text underneath. Additionally, it is possible to use the mark as a stand-alone icon.

While it is possible to use the icon by itself, the logotype must always be accompanied by the mark.

Horizontal version

Square version

Logo Clear Space

Horizontal logo clear space

Yellow indicates clear space. The yellow area must be kept free of all other graphical and visual elements. The minimum required clear space is defined by the measurement 'X' (equal to the x-height of the logotype letters).

Square logo clear space

Yellow indicates clear space. The yellow area must be kept free of all other graphical and visual elements. The minimum required clear space is defined by the measurement 'X' (equal to the x-height of the logotype letters).

Logo incorrect use

Don't change color or typeface

Never change the color of any or all parts of the logo from the original, even if with brand colors. For the 1-color versions, the allowed tints are: black, off-white, and dark blue.

The typeface must be Maven Pro Semibold, and keep the tint and proportions that are shown here.

Don't change the logo proportions, rotate it, or distort it

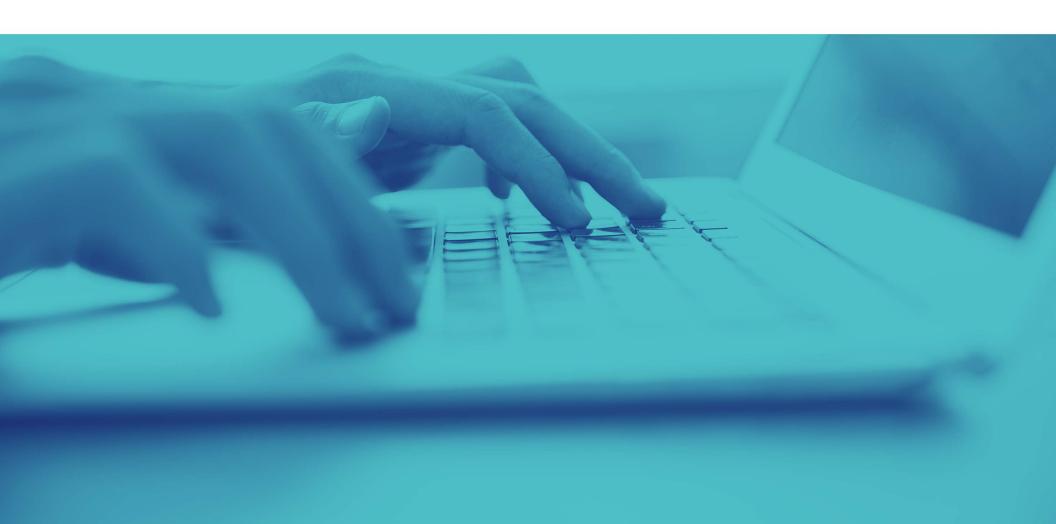

Don't modify, distort, enlarge or stretch any part of the logo from the original.

Don't change the spacing between the icon and the text in any version of the logo, nor change their respective positions.

Color Palette

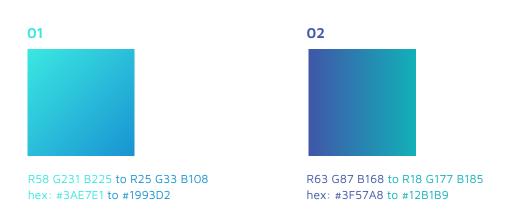

Brand colors

The primary colors of the brand are dark indigo, bright cyan, and off white.

Brand gradients

- O1. From bright cyan to cool medium blue, on a 45° diagonal or vertically
- O2. From light indigo to medium teal, horizontally or diagonally

Typography

Maven Pro Semibold

is the primary font used for the logotype/logo wording. It can be used in titles and when stronger emphasis is needed.

Maven Pro Regular

can be used as the standard in body text and paragraph text.
